CITIZENSHIP EDUCATION, COMMUNITY GOVERNANCE AND PARTICIPATORY BUDGET STRATEGIC PROGRAM

PRESENTATION

Polygonal coordinated this output consisting in a learning-by-doing program of workshops, an international conference, open educational resources and introduction to ICT platforms and apps to boost active citizenship. The program has included virtual webinars and workshops from other organizations.

Polygonal has led and coordinated this program, and monitored actions in the pilot learning villages. The programme has been designed to be virtual and presential. Local partners have implemented different coaching, training and/or educational actions in the learning villages.

Polygonal has transferred its experience from years working with participatory processes in Cori (Italy). Participants have received training in platforms as decidim.org. These platforms have been used to show participatory processes and share knowledge between the learning villages.

This document links to educational contents conforming this pilot training program. It will be further developed in the Learning Villages International Network (LVIN).
